Waqtuk – Design Instructions

This file explains how to open and read the final design of Waqtuk, and what each screen is for. The design is the visual reference for the Phase 4 React front-end. The screens are in the file **Waqtuk_Final_Design.pdf**, and the clickable prototype is the website in **Waqtuk_Prototype_Site.zip**.

---

1. How to open the clickable prototype

The interactive prototype is a small website made of plain HTML files (**Waqtuk_Prototype_Site.zip**).

1. Unzip the file and double-click `index.html`. It opens the Log in page in your browser. No installation is needed.
2. `screens.html` is a list of every screen and every states page. Use it to jump to any screen.
3. To share it with the team or the instructor, publish the folder (free): drag it to https://app.netlify.com/drop, or upload it to a GitHub repository and turn on GitHub Pages. The steps are in the `README.md` inside the zip.
4. On the Log in page, type an email containing “mentor” or “admin” (any password) to open those roles, or use the “Mentor view” and “Administrator view” buttons.
5. The moon/sun button in the top bar switches dark and light mode. Add `?dark` to a page address to open it in dark mode.

What works in the prototype:

- Navigation between all screens from the sidebar, the account menu and the main buttons.
- Dashboard: Day / Week / Month and the previous/next arrows change numbers and charts. `Main.html?empty` shows the empty state.
- Delete, revoke, suspend, unpublish, end sharing, decline and report buttons open a confirmation dialog.
- Save, send, accept and similar buttons show a confirmation message.
- Announcement lists: clicking an item shows its text.
- Light and dark mode on every screen, and a mobile layout below 820 px wide.

What is only a picture (not working):

- Saving does not change the data on screen. All numbers are sample data.
- Forms do not check what you type. The messages for wrong input are shown on the states pages.

---

2. Screens

Role	Screen	File	Phase 3 wireframe	Requirements
All	Log in and sign up	Login	WF-01	ST-F1, ST-F2, MT-F1, MT-F2, AD-F1
Student	Dashboard	Main	WF-02	ST-F3, ST-F9, ST-F10, ST-F16
Student	Activities	Activities	WF-03	ST-F5, ST-F6
Student	Categories	Categories	WF-04	ST-F7
Student	Weekly goals	Goals	WF-05	ST-F8, ST-F10

Role	Screen	File	Phase 3 wireframe	Requirements
Student	Calendar	Calendar	WF-06	ST-F6, ST-F11
Student	Reports and PDF export	Reports	WF-07	ST-F12
Student	Sharing	Sharing	WF-08	ST-F13
Student	Mentor feedback	Feedback	WF-09	ST-F14, ST-F15
Student	Profile and announcements	Profile	WF-10	ST-F3, ST-F4, ST-F16
Mentor	Home (summary of the three parts below)	MentorHome	WF-11	MT-F2, MT-F3, MT-F9, MT-F10
Mentor	Sharing requests	MentorRequests	WF-11, own page	MT-F2, MT-F3
Mentor	Shared students	MentorStudents	WF-11, own page	MT-F3
Mentor	Student overview and reports	MentorStudent	WF-12	MT-F4, MT-F5
Mentor	Goal feedback	MentorGoal	WF-13	MT-F6, MT-F7, MT-F8
Mentor	Announcements	MentorAnnouncements	WF-11, own page	MT-F9, MT-F10
Mentor	Profile	MentorProfile	none (added)	MT-F1
Admin	Dashboard and usage	AdminDashboard	WF-14	AD-F1, AD-F7
Admin	User management	AdminUsers	WF-15	AD-F2, AD-F3, AD-F4
Admin	Default categories	AdminCategories	WF-16	AD-F5
Admin	Reported content	AdminReports	WF-17	AD-F6
Admin	Announcements	AdminAnnouncements	WF-18	AD-F8

Every screen except the Dashboard has a matching “states” page at the end of the PDF (and `*States.html` in the site). It shows that screen’s error messages, empty states and confirmation dialogs.

---

3. Style guide

Font: Inter. Page title 24 px semibold, card title 14 px semibold, body 14 px regular, captions 12 px medium.

Shape and spacing: cards 16 px radius, buttons and inputs 10 px radius. Buttons and inputs are 44 px tall (40 px for small buttons). Spacing steps: 8, 12, 16, 24, 32.

Layout: sidebar 240 px, top bar 64 px, content up to 1160 px wide. Below 820 px wide the sidebar becomes a strip at the top and grids become one column.

Role	Light	Dark
Page	#FFFFFF	#141416

Role	Light	Dark
Soft card	#F7F8FA	#1E1F23
Hover / selected	#F2F3F6	#2A2B30
Border	#ECECEF	#2C2D33
Text	#1C1C1C	#F4F4F6
Muted text	#5F6370	#A3A6B0
Blue card	#EAF2FD	#1B2A40
Lavender card	#EEEFFC	#24264A
Primary button	#1C1C1C, white text	#FFFFFF, dark text
Danger	#C62828	#F0847C

Category colours (both modes): Study #5B6CF0, Work #F2B84B, Exercise #3FB27F, Sleep #A78BDA, Reading #8FB3D9, Social #E58FB0, Gaming #6CC3D6, Commute #9AA0A6.

Messages: error (red), success (green), information (blue), warning (amber), each with an icon. Error messages appear next to the field that caused them.

---

4. Differences from the Phase 3 wireframes

- The “States and interactions” boxes moved from the screens to the states pages.
- The mentor home of WF-11 keeps its three parts as a summary, and each part also has its own page (Sharing requests, Shared students, Announcements) so every item in the mentor sidebar opens a different screen.
- Sample data is the same on every screen. Today is Sat 7 Nov 2026 and weeks run Monday to Sunday (the week is Mon 2 Nov – Sun 8 Nov). This week: Study 6h, Work 8h 30m, Exercise 5h 30m, Sleep 3h, Social 5h, Gaming 6h, total 34h 00m. Goals: Study at least 10h, Exercise at least 5h, Social at most 8h, Gaming at most 4h, so the dashboard shows “3 of 4 goals on track”.
- Default categories are Study, Work, Exercise, Sleep (Commute is shown as inactive on the administrator screen). Custom categories are Reading, Social, Gaming.
- In Sharing, the pending request is from Mentor B and the accepted one from Mentor A (one request per mentor, as ST-F13 requires).
- A Mentor Profile screen was added because the Phase 3 mentor sidebar has a Profile link without a wireframe.
- The account menu (picture at the top right) opens Profile and Log Out. The administrator has only Log Out.

---

5. Note on AI use

The screens were designed with the help of Claude. Per the Milestone 4 rules, the team must list this in the AI Usage Declaration and keep the full conversation as evidence.
